

Initially this was a part of a longer video which included an interview with one of the Cyprus RC champions. However, since we still have to upload some clips before uploading videos longer than 10 minutes, we split the media into 2 different parts. In the second part we invited a well known RC Champion to talk about the system in general as well as hear what features he liked best. The video is just one out of many, planned by the OSRC team and can all be found on the OSRC [YouTube Channel](#)
